

Infrastructure Development: How to Grow the Support Functions in Your Bank

Eric R. Alexander
Six Arrows Consulting

Happy State Bank
\$2B → \$6B
2013 - 2022

LOTS of infrastructure development
in the Finance Department

Outline

- What is infrastructure?
- What is infrastructure development?
- Why bother?
- Infrastructure development:
 - The objective
 - Key elements
 - Three stages:
 - Assessing a function
 - Upgrading a function
 - Creating a new function

What is infrastructure?

The basic support structures needed for the
efficient & effective
operation of an enterprise.

What is infrastructure?

The basic support structures needed for the
efficient & effective
operation of an enterprise.

What is infrastructure?

The basic support structures needed for the
efficient & effective
operation of an enterprise

What is infrastructure...in your bank?

- Deposit operations
 - Facilities
 - Finance
 - HR
 - IT
 - Loan operations
 - Training
- ...and beyond

And we often don't pay much attention to it...

...till it looks like this.

Outline

- What is infrastructure?
- What is infrastructure development?
- Why bother?
- Infrastructure development:
 - The objective
 - Key elements
 - Three stages:
 - Assessing a function
 - Upgrading a function
 - Creating a new function

Infrastructure Development

As your bank grows
– in size or in
complexity – the
infrastructure needs
to grow as well...and
needs to grow *ahead*
of the growth of the
bank.

An analogy

Infrastructure Development

As your bank grows
– in size or in
complexity – the
infrastructure needs
to grow as well...and
needs to grow *ahead*
of the growth of the
bank.

Infrastructure development

- Making existing resources stronger, more effective & efficient
- Adding capabilities & capacity
- De-risking

*Keeping up with (ahead of)
growth & complexity*

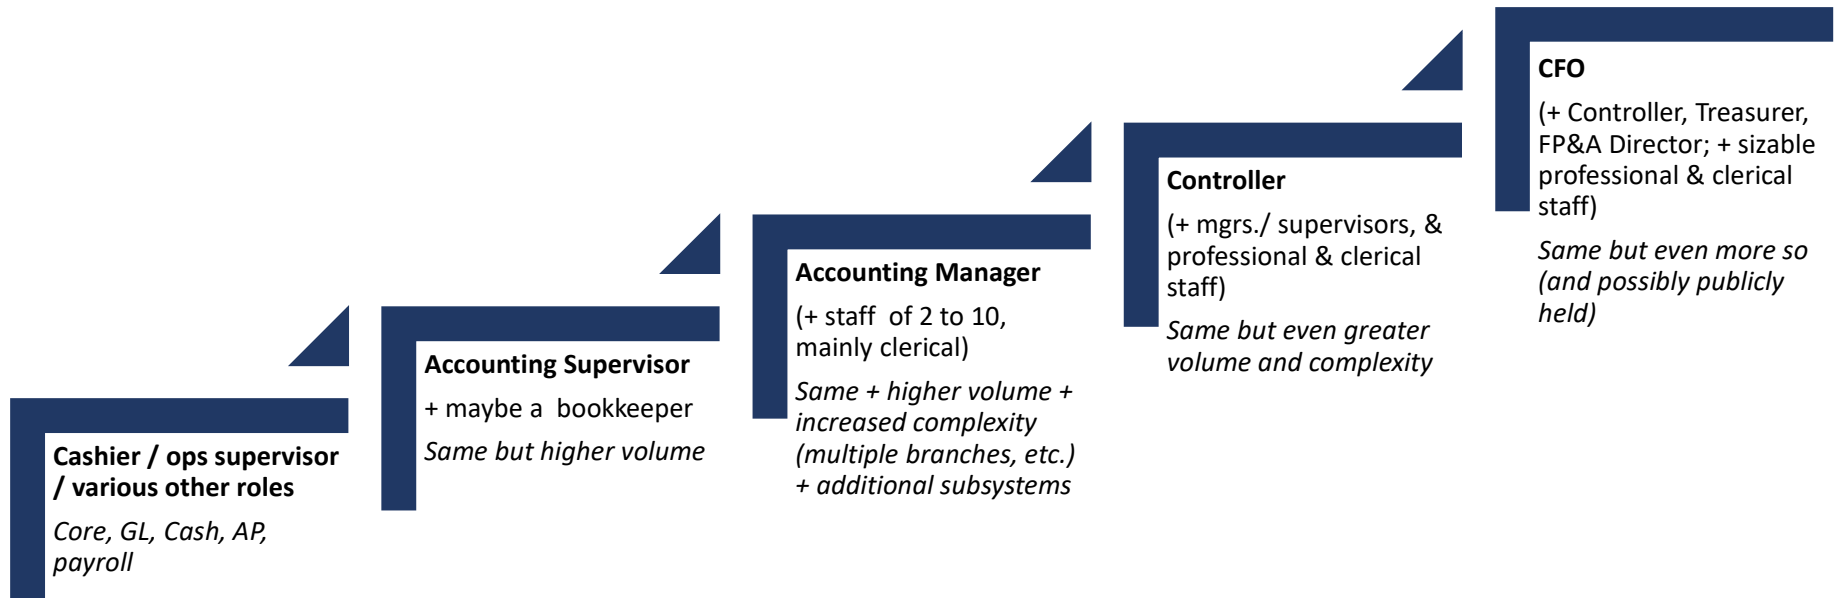

A Finance Dept. example...

- Making existing resources stronger, more effective & efficient
- Adding capabilities & capacity
- De-risking

*Keeping up with (ahead of)
growth & complexity*

Adding capacity in the Finance Dept.

Outline

- What is infrastructure?
- What is infrastructure development?
- **Why bother?**
- Infrastructure development:
 - The objective
 - Key elements
 - Three stages:
 - Assessing a function
 - Upgrading a function
 - Creating a new function

The Alternative:

Relying on
the heroics
of dedicated
people.

Relying on the heroics of dedicated people

Outline

- What is infrastructure?
- What is infrastructure development?
- Why bother?
- Infrastructure development:
 - The objective
 - Key elements

infrastructure migration

- core / systems
- processes
- people (skills, expertise, coordination)

heroics
of dedicated
people

- documentation
- team building
- context / cross training
- automate
- continuous improvement
- skills / knowledge
- accountability

platform / foundation
for growth,
entrepreneurship,
heroics,
marginal
customer
service

system

- stable
- repeatable
- reliable
- efficient
- nimble
- scalable

~~bureaucracy~~

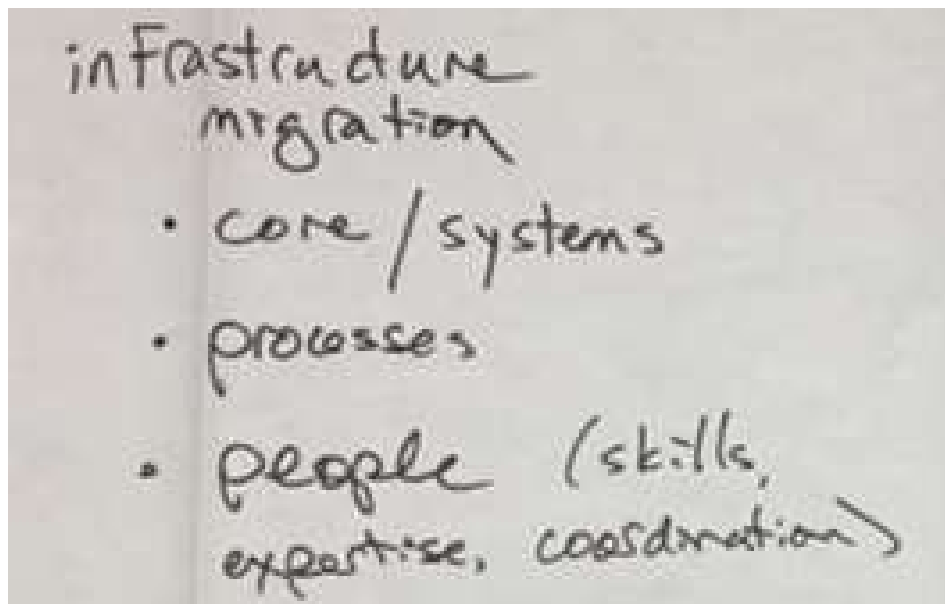

Infrastructure development: the objective

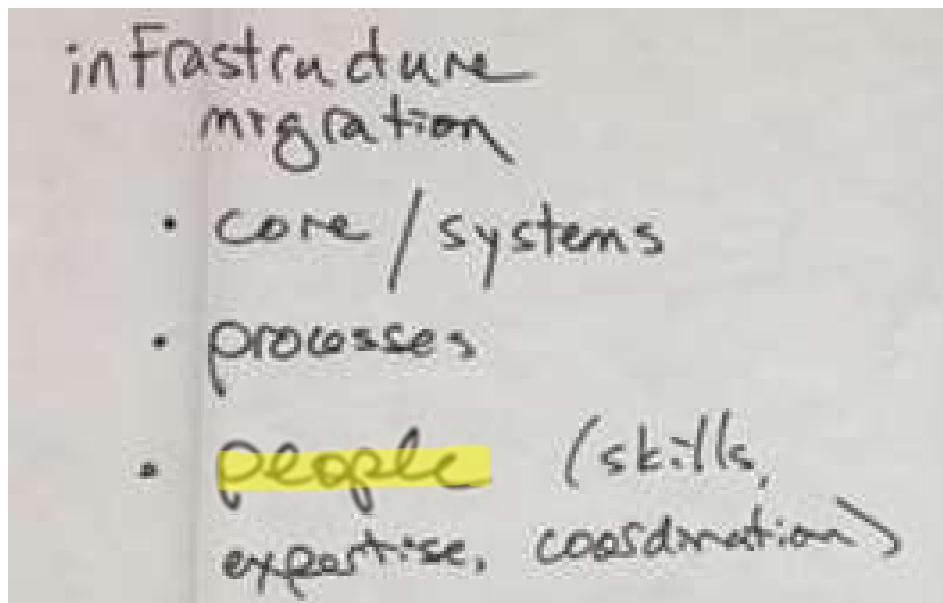

Infrastructure development: the objective

Infrastructure development: key elements

Infrastructure development: PEOPLE

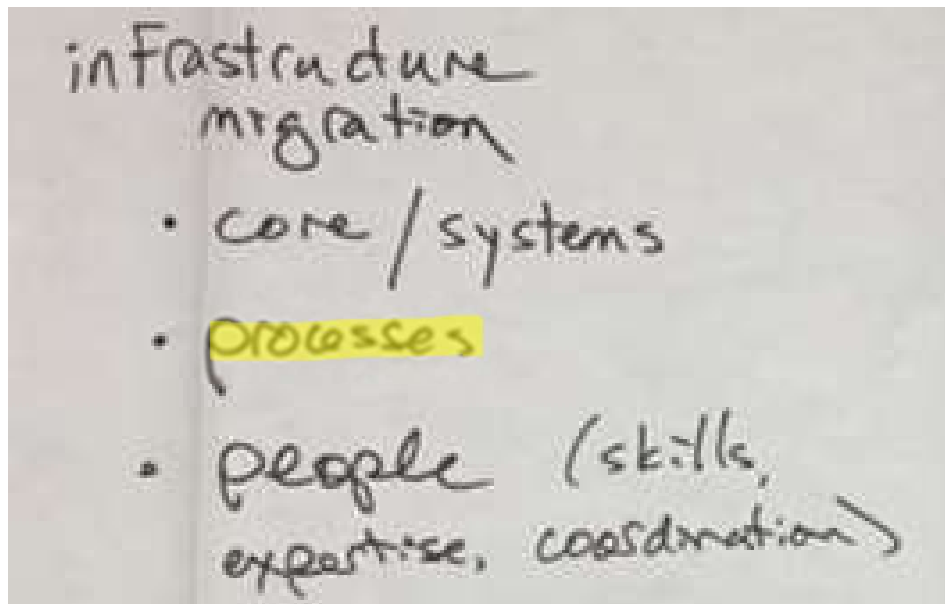

...and **don't overlook the 3rd parties** serving you.
They need the scale & capabilities to serve you well at
the next level, too.

- Skills *Need these...*
- Expertise
- Coordination/teamwork

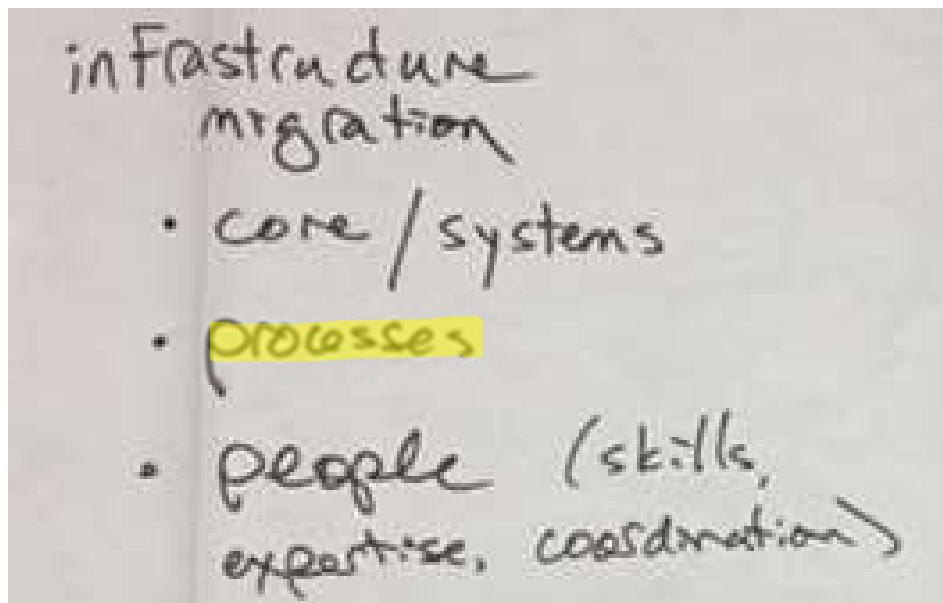

- *Intentional staff development* *Do this...*
- *Careful staff recruitment*
- *Continual backup training*
- *Intentional cultivation of teamwork*

Infrastructure development: PROCESSES, pt 1

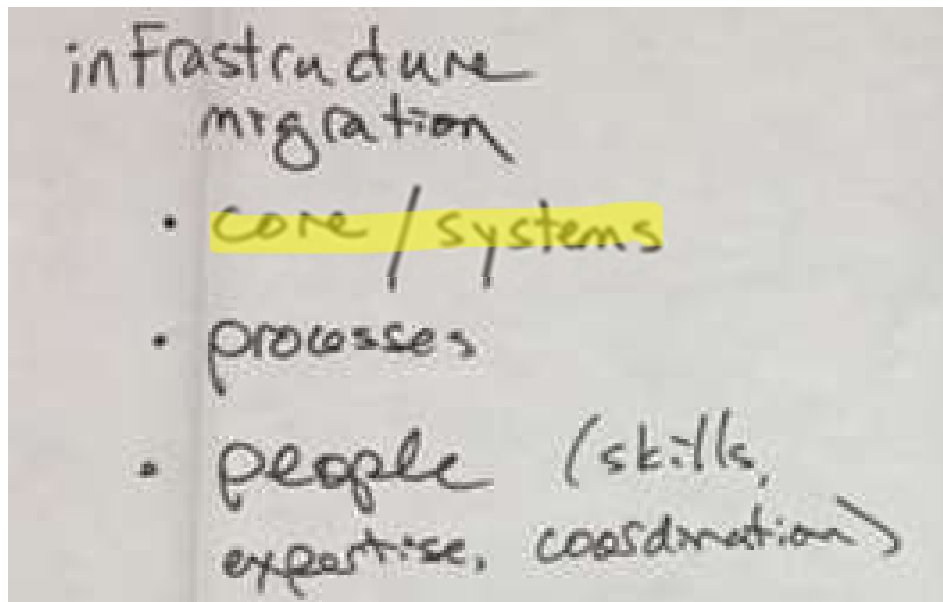

- “Defined & repeatable”
- Keep it simple
- Use common sense
- Streamlined, low-bureaucracy
- Context: upstream & downstream

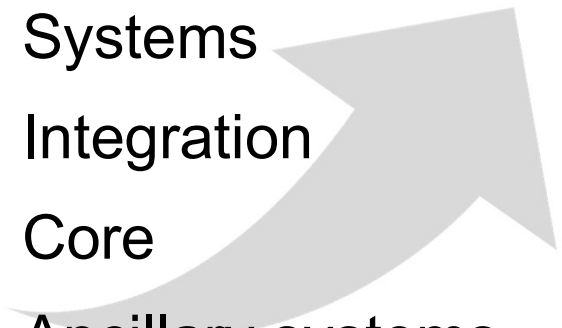

Infrastructure development: PROCESSES, pt 2

- Backups!
- Checklists
- Materiality
- Process assessments
- Continuous improvement
- T accounts

Infrastructure development: PLATFORMS

- Technology
 - Systems
 - Integration
 - Core
 - Ancillary systems
 - Input/output interfaces
- 

Outline

- What is infrastructure?
- What is infrastructure development?
- Why bother?
- Infrastructure development:
 - The objective
 - Key elements
 - Three stages:
 - Assessing a function
 - Upgrading a function
 - Creating a new function

Assessing a function

- Understand & document the flow
- Identify risks
- Always consider efficiency and effectiveness
- Always consider internal controls

[FUNCTION]								
							Comments:	
Assessment (1 to 6; 6 is strong)	[Sub-process]	[Sub-process]	[Sub-process]	[Sub-process]	Composite	Risks (H, M, L)	Opportunities	Other
Technology								
Processes								
Procedures								
Key spreadsheets								
Recons								
Technical knowledge:								
Lead								
[for each sub-process: who?]								
Primary backup								
[for each sub-process: who?]								
Secondary backup								
[for each sub-process: who?]								
Others								
[for each sub-process: who?]								
Controls								
Efficiency								
Documentation								
Processes								
Procedures								
Key spreadsheets								
Recons								
[what else?]								
Overall sub-process risk (H,M,L)								

Assessment (1 to 6; 6 is strong)	[Sub-process]	[Sub-process]	[Sub-process]
Technology			
Processes	<div> Clear? Efficient? Smooth handoffs (upstream and downstream)? </div>		
Procedures			
Key spreadsheets			
Recons			

Secondary backup					
[for each sub-process: who?]	<div> process narrative accurate, up-to-date? process control descriptions precise, concise? (especially key FDICIA controls) Other controls: identified? present? functioning? Opportunities to automate manual controls? Opportunities to identify preventive controls to replace detective? </div>				
Others					
[for each sub-process: who?]					
Controls					
Efficiency					

Efficiency			
Documentation	<div> Up-to-date? Thorough? Clear? (incl logic, data sources, purpose...) Hyper over-explained? Accessible? </div>		
Processes			
Procedures			
Key spreadsheets			

[illegible]

Upgrading a support function, pt 1

Assess first. Then...

- People: train, cross train, bolster collaboration, context awareness
- Process: document, document, document; question each step; add accountability

Upgrading a support function, pt 2

- Platform: consider upgrading; look for automation opportunities
- Pay attention to the challenges of change management...especially at it relates to all the people affected

Creating a new support function

- People, processes, platforms: evaluate all key elements
- Gradual, incremental (if possible)
- Learn from others
- Be realistic about your needs
- Don't build silos

Recap: key themes

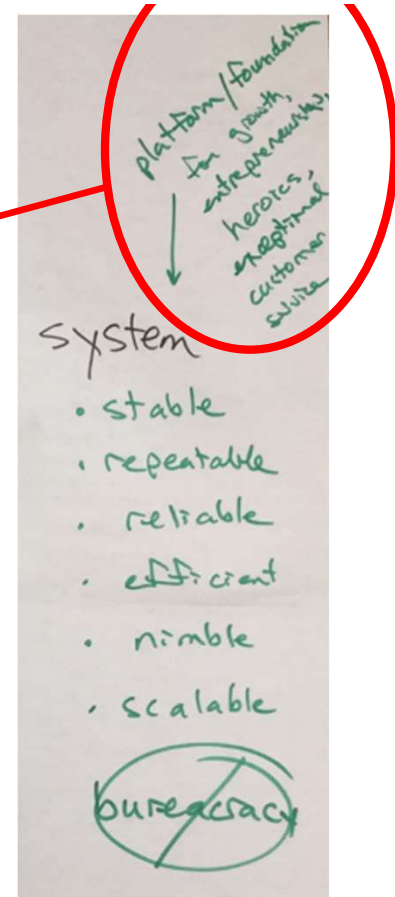

- Always stay ahead of the growth and complexity curve
- People, processes, platforms
- Document, document, document
- Context, context, context
- Risk, risk, risk
- Materiality
- *The cumulative power of (often minor) compounding improvements*

The Objective

“Platform/foundation for...

- growth
- entrepreneurship
- heroics of dedicated people
- exceptional customer service.”

heroics
of dedicated
people

infrastructure migration

- core / systems
- processes
- people (skills, expertise, coordination)

heroics
of dedicated
people

- documentation
- team building
- context / cross training
- automate
- continuous improvement
- skills / knowledge
- accountability

platform / foundation
for growth,
entrepreneurship,
heroics,
marginal
customer
service

system

- stable
- repeatable
- reliable
- efficient
- nimble
- scalable

~~bureaucracy~~

Navigate Change with Confidence.

Coaching  Advisory Services

- 35+ years of financial management leadership
- 20 years of executive leadership experience
- Former CFO, Happy State Bank
- Extensive experience in coaching & developing leaders
- Active leadership involvement in numerous strategic transactions, including acquisitions, capital raising and major system conversions

- Coaching for leaders
- Advising on M&A and other strategic transactions
- Advising on the evolution of Finance's role and contribution

Eric Alexander, President of Six Arrows Consulting, brings coaching and advisory services to leadership teams of community banks and other mid-market companies to help them navigate the challenges of change.

As part of his 35+ years of financial management leadership, Eric led the financial team of Happy State Bank (a \$6 billion community bank headquartered in Amarillo, Texas) for nearly 8 years as CFO until its acquisition in early 2022.

Eric earned an MBA and holds professional certifications as a Certified Public Accountant, Chartered Financial Analyst and Certified Management Accountant. He is a 2017 graduate of the Stonier Graduate School of Banking and is now part of the faculty. He has been published in professional journals including the *Journal of Accountancy* and presents at industry and continuing education events.
